

Project Executable Files

Date	15 March 2026
Team ID	
Project Name	Credit Card Approval Prediction System
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes/No / NA)
1	Complete source code	Yes
2	README / Setup Guide	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files	NA
5	Environment configuration file	NA
6	Deployed application URL	NA
7	APK / Executable binary	NA
8	Dockerfile / Containerization config	NA
9	Test files and test results	Yes
10	Demo video or walkthrough	No

Step 2: File / Folder Structure

Credit_Card_Approval_Prediction_System/ — Dataset/

Documents of project/
IBM_Deployment/
models/
best_model.pkl
feature_columns.pkl
label_encoders.pkl
notebook/
Credit_Card_Approval_Prediction.ipynb
static/
templates/
app.py
utils.py
requirements.txt
Procfile
runtime.txt
manifest.yml
README.md
LICENSE
.gitignore

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Available (IBM Cloud deployment pending due to account activation requirement)
Login Credentials (Demo)	Not Required
Platform /Hosting Provider	Local Flask Application

Repository Link	https://github.com/Durga1607/credit-card-approval-prediction
Demo Video Link	

Step 4: Run Instructions

1. Clone/download the repository.
2. Open the project folder.
3. Install dependencies using `pip install -r requirements.txt`.
4. Run `python app.py`.
5. Open `http://127.0.0.1:5000`.
6. Enter applicant details and click **Predict**.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	IBM Watson deployment could not be completed because IBM Cloud account activation requires billing verification.	Pending SmartBridge/IBM activation credentials.
2	Prediction quality depends on the dataset used for training.	Can be improved by training with larger and more diverse datasets.
3	The application currently processes one applicant at a time.	Batch prediction can be added in future versions.
