

Demonstration of Proposed Features

Date	15 March 2026
Team ID	
Project Name	Credit Card Approval Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	Credit Card Approval Prediction	Predicts whether an applicant is likely to be approved or rejected using the trained machine learning model.	Implemented	Yes	Working successfully
2	Applicant Input Form	Collects the applicant's demographic, employment, family, and financial information through the web interface.	Implemented	Yes	Working successfully
3	Data Preprocessing & Feature Engineering	Processes user input, encodes categorical values, and generates the engineered features required by the trained model.	Implemented	Yes	Integrated with Flask backend
4	Prediction Confidence Score	Displays the confidence score associated with the machine learning prediction.	Implemented	Yes	Displayed on result page
5	Applicant Summary	Displays a summary of the applicant information along with the prediction result.	Implemented	Yes	Displayed on result page
6	Responsive Flask Web Interface	Provides Home, Prediction, and Result pages through a user-friendly web application.	Implemented	Yes	Fully functional locally

Feature Implementation Summary:

Field	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
